

ILLINOIS COMMERCE COMMISSION, COMPETITION DATA REQUEST

Service Date: December 31, 2006

Company Name: Contact Person (Respondent): Parent/Holding Company: Contact Phone #: Regulatory Status: (ILEC or Non-ILEC) Contact E-Mail Address: **Who Must File:**

All incumbent local exchange carriers ("ILECs") and local exchange carriers certificated within the state of Illinois must complete the Cover Page, the Company Identification Information, and Charts 1A, 1B, 1C, 1D, 1E and 2. ILECs must complete Charts 3 and 4. Carriers that are certificated to provide local exchange service within the state of Illinois and broadband service providers within the state of Illinois must also provide, per Chart 5, a copy of the Form 477 that includes information for Illinois as of December 31, 2006 that is to be filed with the FCC on or before March 1, 2007. 911 Database providers are required to complete Chart 6. Carriers that are certified to provide service, but that do not currently offer either local exchange service or facilities based broadband service within the state of Illinois may simply respond with a letter or e-mail to that effect. ILECs and their affiliates should submit separate forms for incumbent and non-incumbent operations.

When to File:

Reporting carriers must submit data for December 31, 2006 on or before March 1, 2007.

Where to File:

E-mail your filing to jzolnier@icc.illinois.gov. Alternatively, filings can be sent on 3.5" diskettes or CDs in IBM format to James Zolnier, Telecommunications Division, Illinois Commerce Commission, 527 East Capitol Avenue, Springfield, IL 62701.

Reminders:

Do not insert or delete columns or rows, move cells, or edit text or cells outside the cells provided for data entries. Files that cannot be opened in Excel 2003 or whose structures have been altered will be returned for refiling. If you cannot adhere to these standards, please call ICC staff for assistance.

Naming convention for your files:

*Concatenate the Month, Year, Company Name, and .XLS
(Example: 1206TELCOINC.XLS)*

Questions: Call Jim Zolnier at: (217)524-5073

Confidentiality:

The collection of this information stems from the Commission's authority under Section 13-407 of the Illinois Public Utilities Act. The Worksheet entitled "Confidentiality" provides detailed information as to the treatment to be accorded the data that carriers file.

ILLINOIS COMMERCE COMMISSION, COMPETITION DATA REQUEST

Service Date: December 31, 2006

(220 ILCS 5/13-407)

Sec. 13-407. Commission study and report. The Commission shall monitor and analyze patterns of entry and exit and changes in patterns of entry and exit for each relevant market for telecommunications services, including emerging high speed telecommunications markets, and shall include its findings together with appropriate recommendations for legislative action in its annual report to the General Assembly.

The Commission shall also monitor and analyze the status of deployment of services to consumers, and any resulting "digital divisions" between consumers, including any changes or trends therein. The Commission shall include its findings together with appropriate recommendations for legislative action in its annual report to the General Assembly. In preparing this analysis the Commission shall evaluate information provided by telecommunications carriers that pertains to the state of competition in telecommunications markets including, but not limited to:

- (1) the number and type of firms providing telecommunications services, including broadband telecommunications services, with the State;
- (2) the telecommunications services offered by these firms to both retail and wholesale customers;
- (3) the extent to which customers and other providers are purchasing the firms' telecommunications services;
- (4) the technologies or methods by which these firms provide these services, including descriptions of technologies in place and under development, and the degree to which firms rely on other wholesale providers to provide services to their own customers; and
- (5) the tariffed retail and wholesale prices for services provided by these firms.

The Commission shall at a minimum assess the variability in this information according to geography, examining variability by exchange, wirecenter, or zip code, and by customer class, examining, at a minimum, the variability between residential and small, medium, and large business customers. The Commission shall provide an analysis of market trends by collecting this information from firms providing telecommunications services within the State. The Commission shall collect all information, in a format determined by the Commission, that the Commission deems necessary to assist in monitoring analyzing the telecommunications markets and the status of competition and deployment of telecommunications services to customers in the State.

Confidentiality: The collection of this information stems from the Commission's authority under Section 13-407 of the Illinois Public Utilities Act. The following provides an outline of what protection Staff will afford the filings.

The information reported in the Worksheets "Cover Page" and "Company Identification Information" will be considered public and Staff may provide information from these charts to the public.

The information reported in the Worksheets "Retail (Owned) - Chart 1A", "Retail (UNE) - Chart 1B", "Retail (Commercial) - Chart 1C", "Retail (Resale-Other) - Chart 1D", "Retail (Non-ILEC) - Chart 1E", "Infrastructure - Chart 2", "ILEC Adv. Svcs. - Chart 3", "Part 790.350 Compliance - Chart 4", "FCC Form 477 - Chart 5", and "E-911 Data - Chart 6" will be aggregated to maintain the confidentiality of individual carrier subscribership information. Subscribership information will be aggregated (e.g., according to carrier class or technology) and reported at the LATA level and will not be reported publicly at a further level of disaggregation. Where there are fewer than 4 carriers of a particular class or using a particular technology operating in a particular LATA information will be reported based upon aggregated geographical areas (e.g., information may be reported for the combination of two LATAs) in order to maintain the confidentiality of individual carrier subscribership information.

While confidentiality at the carrier level will be maintained, Staff will make an exception for provision of wholesale service. Aggregate incumbent local exchange carrier subscribership to wholesale offerings at the LATA level may be made public even when a single incumbent local exchange carrier provides a particular offering.

Definitions:

Plain Old Telephone Service (POTS) Lines - Lines used to connect an end-user to the public switched telephone network (PSTN), and used to provide voice telephone service in this state. For purposes of this data collection, "voice telephone service" means local exchange or exchange access services that allow end users to originate and/or terminate local telephone calls on the public switched network, whether used by the end user for voice telephone calls or for other types of calls carried over the public switched network (for example, lines used for facsimile equipment or lines used occasionally or exclusively for "dial-up" connection to the Internet). Includes: Traditional analog POTS lines, POTS lines provided over Centrex extensions or trunks, and POTS provisioned over high capacity circuits. Counts should include POTS services provided using all non-nomadic, non-mobile technologies including, but not limited to, non-traditional technologies such as fixed wireless, hybrid fiber-coaxial cable, and internet protocol technologies. Include revenue producing lines only.

Voice Grade Equivalents - Report voice-grade equivalent lines. Count as one voice-grade equivalent line: traditional analog POTS lines, Centrex-CO extensions, and Centrex-CU trunks. Count lines based on how they are charged to the customer rather than how they are physically provisioned. That is, when a customer is charged for channelized service, report the number of activated, charged-for channels rather than the theoretical capacity of the line. Examples: Count Basic Rate Integrated (BRI) Services Digital Network (ISDN) lines as two voicegrade equivalent lines. Count fully-channelized PRI circuits (including PRIs that are used exclusively to provide local connectivity to "dial-up" ISPs) as 23 voice-grade equivalent lines. But report, for example, 8 voice-grade equivalent lines if a customer is charged for 8 trunks that happen to be provisioned over a DS1 circuit. If a customer is charged for a fully-channelized DS1 circuit, however, report 24 voice-grade equivalent lines.

Exchange - The rate exchange area associated with the first six digits (NPA-NXX) of the customers POTS telephone number. Exchange names should match those found in Telcordia Technologies, Inc.'s Local Exchange Routing Guide Table 6 (LERG 6).

COMPANY IDENTIFICATION INFORMATION

When this response is being prepared for multiple certified carriers, please list below the names of all carriers covered by the information filed in this workbook. Please list the names as they appear on the carrier's Illinois telecommunications certification (if the carrier is certified). For example, a company that reports on the Cover Page that it is filing for the company named Telecom Telco which consists of the the certificated entities Telecom Telco, Inc. and Telecom Business Services, Inc. should list the names of the certificated entities Telecom Telco, Inc. and Telecom Business Services, Inc. on the worksheet spaces below.

CHART 1A - RETAIL "POTS" LINES PROVIDED OVER LOCAL LOOPS YOU OWN

Put an X in this box if no services on this chart are offered in Illinois: ☐

Include: "POTS" Local exchange lines provided to end-users expressed in voice grade equivalents (VGEs). Lines reported here should be provided over loop facilities that you own (or lease from a non-telecommunication provider).

Exclude: Local exchange lines sold to other carriers. In addition do not include lines reported in Charts 1B, 1C, 1D, or 1E.

No Customers/No Service: If you currently have no customers of a particular type or do not offer a particular type of service in an area which you otherwise serve, then enter zero in the appropriate column for that area.

CHART 4 - Part 790.350 Compliance (INCUMBENT LECS ONLY)

Section 790.350 of the Commission's Administrative Rules requires every incumbent local exchange carrier to provide the following information to the Commission:

- 1) The telecommunications carriers that are collocated and interconnected at ILEC premises, and the collocators that have purchased unbundled network elements;***
- 2) The general location in the ILEC's network (as identified as a central office, adjacent space, or a remote location) at which point each interconnection occurs;***
- 3) The specific unbundled network elements purchased by each particular telecommunications carrier and the total quantity of each unbundled network element that has been purchased by the telecommunications carrier;***
- 4) With respect to telecommunications carriers that have been refused interconnection and collocation, and the telecommunications carriers that have been refused unbundled network elements, the reason for refusal and the premises relating to the refusal.***

Please provide any and all information required by Part 790.350 here. If documents are provided as separate attachments or submitted under separate cover, please identify such attachments here. If none of the above are applicable to your ILEC operations, then please state that below.
